

Promoting a better understanding of developments in the global economy

Since 1998, The John Marshall Law School Center for International Law, through its Master of Laws Program in International Business and Trade Law, has provided the legal, trade, and business communities in Chicago with programming that addresses a range of issues in international economic law.

In addition to courses and CLE programs and conferences, the Center hosts the *Global Markets Law Journal*, an online publication that examines the law of capital markets, including securities, commodities, futures, options, derivatives, and related issues.

2014 DERIVATIVES CONFERENCE

Dodd-Frank & Derivatives The Evolving Regulatory Landscape

APRIL 11, 2014 • CHICAGO, ILLINOIS

MASTER OF LAWS PROGRAM IN INTERNATIONAL BUSINESS AND TRADE LAW

Dodd-Frank & Derivatives: The Evolving Regulatory Landscape

In an effort to assist attorneys, compliance officers, and market participants in staying abreast of the changing legal landscape of derivatives, the Center for International Law at The John Marshall Law School is pleased to present its second conference on derivatives. The title of this year's conference is "Dodd-Frank & Derivatives: The Evolving Regulatory Landscape." Industry professionals and legal practitioners will share their insights into the most important developments in the dynamic field of derivatives, as well as discuss future implications.

The conference will examine the roles of derivatives in the modern financial landscape and delve into complex and evolving regulatory, compliance, enforcement, and legal issues. Among other things, the conference will focus on:

- The impact of the Dodd-Frank Act as it approaches its fourth anniversary
- The impact of the CFTC's rulemakings on industry registrants and market participants
- Current enforcement developments at the CFTC and the exchanges
- The changing roles of exchanges, clearinghouses, market participants, and end-users
- Key issues in market structure and compliance

We look forward to welcoming you and your colleagues to John Marshall on April 11. This will be an ideal opportunity to explore new developments in derivatives.

Professor Paul B. Lewis
Director, Center for International Law

Matthew Kluchenek
Conference Chair, Baker & McKenzie LLP
